

# HOOKUP CULTURE

## BY THE NUMBERS

**71%** define a hookup as making out

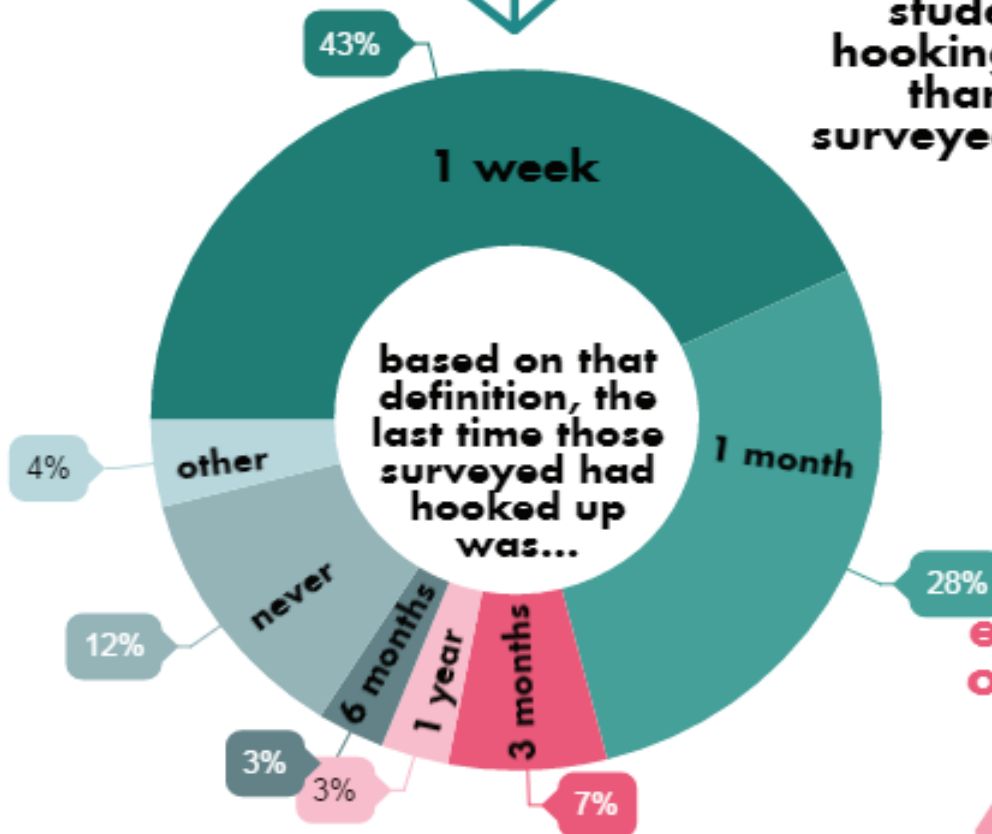

the rest define it as...

it seems that NT students are hooking up more than those surveyed thought--

**47%**

believed the average NT student hooks up about once a month

even though hookups occur often, dating was preferred over hooking up

**45%** of the time (the other 55% was split between 'no', 'I've never hooked up or dated before' and 'I don't know')

60% of NT students surveyed are hooking up with the same people, but also different people as well

**73%**

reported hooking up with someone they hadn't met before, including hooking up over the internet or dating apps

and though only 12% are hooking up with different people every time,
